

MODEL 2900 TRACK

Track Stump Grinder

The Model 2900 Track is an extremely versatile machine and is designed mainly for **high production grinding applications** including lot clearing and large stump removal jobs. One of the reasons this unit is so popular is that it is also an excellent backyard stump grinder. Contractors specializing in large stump removals in tight locations use the 2900 Track because of its speed and maneuverability. The 2900 Track is a **great all-around stumper**, featuring heavy-duty steel construction and engine options ranging from 165 horsepower.

MANEUVERABLE AND POWERFUL

- **165 Horsepower** engine options available
- Low-maintenance **hydrostatic drive**
- Available with **swingout curtain assembly** and a **grading blade**

Turf Friendly

The track drives are independent from each other, allowing for high maneuverability with a zero-turning radius. The turf-friendly rubber track undercarriage provides great flotation, allowing it to travel over lawns and golf courses without leaving much of a foot print. The rubber tracks will retract to 35" allowing the 2900 Track to fit through a standard 36" backyard gate, and expand out to 53" for added stability. The undercarriage utilizes four cylinders, allowing the tracks to stay parallel as they retract and expand, minimizing wear and increasing longevity.

Cutter Dimensions

Impressive grinding dimensions add to the overall productivity of the 2900 Track, allowing it to tackle stumps of all sizes. Cutting dimensions include a cutter swing of 75", a cutting depth of 24", and a cutting height of 31-1/2", reducing the number of times the unit will need re-positioned.

Higher-Capacity Tanks

The Model 2900 Track boasts a 14-gallon steel fuel tank and a 29-1/2 gallon hydraulic tank. The large fuel tank provides for more than a days worth of fuel, while the hydraulic tank provides plenty of hydraulic fluid optimal performance and cooling.

Specifications

Dimensions:

Length:	155" with blade	Width:	35" to 53"
Height:	75"	Weight:	5,920 lbs
Fuel Tank:	14 gallons	Hydraulic Tank:	29.5 gallons

Cutter Wheel System:

24-1/2" diameter x 1-1/4" hydrostatic engagement Revolution wheel			
Number of Teeth:	32	Cutter Swing:	75"
Cutter Depth:	24"	Cutter Height:	31-1/2"

Drive System:

Self-Propelled, with a rugged, "Turf Friendly" rubber track undercarriage

Engine:

165 horsepower engine options available
